

## MATH 22AL

## LAB # 6

## Saving, Editing and Submitting your work

## Exiting MATLAB Session

When you finished the lab, type the following commands

Type	<code>save</code>	to save your variables (Matrices) in a file called <b>matlab.mat</b> which is a binary format file.
Type	<code>diary off</code>	To stop writing , save and close the file <b>LAB99.text</b>
Type	<code>exit</code>	To end MATLAB session.

## Editing your LAB6.text file

1. After exiting MATLAB session on Computer command line (you should see a dollar sign) type pico

Type	<code>pico LAB6.text</code>	open your LAB6.text file
------	-----------------------------	--------------------------

2. Remove all errors that you made during working, do not delete the errors related to the commands that LABS asked you to do.
3. When finished, use **Control + "o"** to save changes you made.
4. Use **control + x** to exit pico.

## Submitting your LAB6.text file

After exiting MATLAB session and editing your file and exiting pico on Computer command line (you should see a dollar sign) type

**submitm22al LAB6.text**

You should see a reply from computer that reads:

**sending LAB6.text to math 22al ta**

This is the verification that you can take a picture of it and it guarantees that the TA will receive your work
