

Saving, Editing and Submitting your work

Exiting MATLAB Session

When you finished the lab, type the following commands

Type	<code>save</code>	to save your variables (Matrices) in a file called matlab.mat which is a binary format file.
Type	<code>diary off</code>	To stop writing , save and close the file LAB10.text
Type	<code>exit</code>	To end MATLAB session.

Editing your LAB10.text file

1. After exiting MATLAB session on Computer command line (you should see a dollar sign) type pico

Type	<code>pico LAB10.text</code>	open your LAB10.text file
------	------------------------------	---------------------------

2. Remove all errors that you made during working, do not delete the errors related to the commands that LABS asked you to do.
3. When finished, use **Control + "o"** to save changes you made.
4. Use **Control + x** to exit pico.

Submitting your LAB10.text file

After exiting MATLAB session and editing your file and exiting pico on Computer command line (you should see a dollar sign) type

submitm22al LAB10.text

You should see a reply from computer that reads:

sending LAB10.text to math 22al ta

This is the verification that you can take a picture of it and it guarantees that the TA will receive your work
